Rev. A. J. Law, B.A., Pastor

CARD OF THANKS

Dr. and Mrs. A. K. McNeill and Harold Boyd, wish to thank their kind friends for their many expressions of sympathy and beautiful floral tributes sent during their recent sad bereavement.

U.S. Relief To Take Form of Wages

President Roosevelt has addressed the masses House and Senate to propose legislation abolishing "freet or 'dole' relief in the United States and substituting a vast system of wage-paying jobs on public works. The message says of the \$5,000,000 on federal relief, 1,600,000 are unemployed and will be turned back to their states at once as dependents. The employable 3,500,000 are to be given employment through utilization and extension of construction projects. The pay will be above the relief figure, less than the wages paid in private employment, so that no person may be tempted to leave private employ for federal work or refuse an opportunity to be privately absorbed. The costs of the new program appear to banish hope of a balanced budget in 1936. But if the budget stays out, the public morale is expected to edge back into balance—the new scheme instead of supporting needy men, enables them to support themselves—Christian Sc. Monitor.

Previous drifting and snows of the past few days have made roads in this locality usable for shooting only.

IMPOUNDED

One Steer, color Red, dehorned, age two years, no visible brand, white under body, half tail white. Found by A. T. Barber, Bindle townsite.—J. H. Higher, Bindle, Bindle, Date, December 26th, 1934.

Social Credit Dance Draws Large Attendance

Registration of Firearms

Evidence of the growing interest in Social Credit was contained in the large attendance held in the Theatre on Monday, January 7. The hall had been well decorated for the occasion, and a large number of musicians were on hand for the event, and supplied pleasing musical rhythm and harmony to the dancers during the evening and early hours of the morning. Dancing continued at a pleasing rate throughout, and everyone was perfectly satisfied when the strains of "Home Sweet Home" brought the dance to its close. The various members of the committee and members of the group worked well together and achieved good success in making this initial effort one of the outstanding events of the season.

Value of Field Crops

Value of field crops in Alberta for the past season has been estimated at \$10,594,000 by the Dominion Bureau of Statistics at Ottawa. The wheat crop, estimated at 112,000,000 bushels, is valued at \$59,025,000, compared with \$8,745,000 for 1933.

Total Marriages Increased

In 1934, up until November 30, there were 5400 marriages performed in Alberta, as against 5093 for the same period last year, or an increase of 313. For the first eleven months of the year in Edmonton, there were 1193 marriages as against 1037 last year. Calgary reports 970 marriages as against 917 last year. For the rest of the province there were 3240 for the first eleven months, with 3139 in the same period last year.

Coal Production

The total coal production of Alberta mines to the end of November was 4,180,823 tons, compared with 4,057,615 tons for the same period of 1933.

Package of 50 cigarette brought by Dom. Cafe—L. E. Niwa, Empress

Jar of Mincement Preserves—Gavin Hamilton.

Weather of the past week has continued cold. There was quite a little snowfall on Tuesday and on Wednesday we enjoyed an abatement in temperatures, which has continued today.

R. Corwithale, fireman, Canadian Pacific Railway, Engineer John Y. D. Thompson, Mr. Brophy, Port Arthur, aboard yard engine "6080" putting 150 men on board, took a 1000 mile, 16 hours, 53 minutes, putting the ship in possession of steamship "Empress" for all legs of the Pacific crossing.

Miss Georgia Englehart, slim girl Alpinist of New York, this summer, highest peak in the Canadian Rockies, and in doing so became the first woman to climb the Banff Lake Louise area. Two years ago she set a new woman's endurance record by climbing by screeing 38 peaks in a single summer in that section.

Last winter fares good from December 15 to April 15, 1935, including offering by the railways covering round trips to Canada's Evergreen playgrounds, Victoria and Vancouver in British Columbia called Vancouver Island, with the beautiful coast line of the Gulf of Georgia, and all the sports attractions of summer available during the winter months, all within the purse limits of the average Canadian.

The big event of 1935 will be the 50th anniversary of the picturesque functions of the 25th anniversary of King George's accession to the throne of Great Britain, which will continue until well into July. Summer sailings of Canadian Pacific steamships will be limited to 10 days, and the company planned to connect with these events.

The Laurentians, Eastern Canada's winter playground, face the hills and sea in their most dramatic and attractive scenes of ski events calling for 10 miles of very hard snow. The Canadian and International inter-collegiate championships extending from January 1st to April 1st, is announced by the Laurentian Zone committee of the Canadian Amateur Ski Association.

According to the immediate recommendation of the Health Commission's report, no professional football in Canada in 1935, it was unanswered question as to if a business would be the Professional Football League, but recently, as Ontario

Marcus Gunn Boyd

The death occurred on Thursday, January 3rd, of one of Empress' oldest, and most beloved citizens, Marcus Gunn Boyd.

Mr. Boyd was born in Owen Sound, Ontario, in 1878. In 1903 he married Harriette Reilly, and they settled in Froud, Saskatchewan. In 1913 they moved to Empress. During the years to live in Empress he took an active part in the social, religious and business life of the village, being at different times a member of the Board of Trade, the Church Board of the United Church and the School Board.

On February 3rd, 1929, Mrs. Boyd passed away, and a year later, Mr. Boyd was stricken with an incurable spinal disease. During his five years of illness he was always cheerful without ever a complaint.

The esteem in which he was held by the boys and his friends was in no small measure shown by the beautiful floral wreath which was received from The Family, Dr. Daveler, Mr. and Mrs. R. A. Pool and Ellis family; Bob and Barbara (brother and sister); Hospital Staff; Mr. and Mrs. W. MacKee; Misses Tarr and Ramsbottom; Mr. and Mrs. Goo, Leach and Higgins; Mr. and Mrs. M. L. Higgins and family; Mrs. Mackie, Victoria, Berol and Vere; Mr. and Mrs. Brodie and family; Mr. and Mrs. Wm. Stöhrer; Ladies of the Congregation; Mr. and Mrs. Don, McRae; Mr. and Mrs. Maxwell, Barbara and Johnny; Mr. J. L. Kelley and Miss Jean Kelley; Mr. and Mrs. N. D. Storey; The McIshehern and Moore Family; Mrs. Sexton, Kuthien and A. Haukin; Mr. and Mrs. E. McCune; Captain and Mrs. Dore, Captain and Mrs. Key, Dr. Thorslakson, Mr. and Mrs. Dore, Captain and Mrs. Key, Dr. Key, both of Owen Sound.

The deepest sympathy of their many friends go to the bereaved family.

Winter Highway Program

Winter road clearance program of the provincial Department of public works for the present winter, will cover practically the same mileage of main highways as last season, approximately 1,000 miles. This will be carried out and extended as rapidly and successfully as weather conditions permit.

Social Credit Study Meetings

Two Social Credit Group meetings were held on Wednesday afternoon and evening in the school-room of the United Church. The afternoon meeting was particularly for ladies, the first study lessons were undertaken, and an instructive and an interesting meeting resulted.

Much interest was evinced in the meeting held in the evening and nearly all of the ladies who had attended in the afternoon remained. It was estimated there was about 100 people in attendance. Lessons were continued on up to lesson four and interest was maintained throughout. D. Lush acted as instructor at both meetings. U. R. Moore was chairman in the evening. The next meeting is to be held in the school-room on Tuesday, January 22.

Play-Writing Competition

January 4, 1935

The Carnegie Trust Fund Play Writing Competition, conducted by the Department of Extension of the University of Alberta, closes on February 2nd, 1935. The prizes offered are \$125.00 for the best three-act play; \$75.00 for the best one-act play; and \$50.00 for the third best play chosen from either group. The judges are appointed by the department, and it is felt that the plays submitted are of insufficient merit to justify an award.

This will be the third play-writing competition conducted by the Department since the Carnegie endowment was made. A. F. Key of Drumheller, won the highest award in the first year, D'Arcy March of Calgary, second place, and M. Church and G. Storndale-Bennett, of Lethbridge, won third prize for their play written in collaboration. In the 1931 contest, Elsie Park Gowen, of Edmonton, won first prize with her one act play, "The Giant Killer"; E. J. Thorlakson won second prize with Dorelak, and A. F. Key, third prize with X O X, a political satire. A special prize was awarded to George Buguet for his play "Lil Dorey."

A number of the plays submitted to the Carnegie Competition have been produced in various places in Alberta. It is hoped that some of this year will have good merit and that it will be possible to make an award in every class.

Fall particulars regarding the competition may be obtained from E. A. Corbett, Director, Department of Extension, University of Alberta.

St. Mary's Anglican Church

Sunday, Jan. 13, Evensong, 7:30 p.m.

Monday, January 14th, the annual Parishioners Meeting will be held at the Vicarage at 3:00 p.m.

I hope that all worshippers will attend this meeting to attend to the business of the Church.

J. S. Parks Vicar.

Highlights of Premier Bennett's Speech

Ottawa, Jan. 5—Following are some outstanding quotations from the speech of Prime Minister R. B. Bennett on Friday night, January 4:

"As a lawyer I had to do, for more than 20 years with big business and finance, I have some knowledge of finance."

"When in the past I praised it (the capitalist system) I did so with knowledge. When now I analyze it and point out defects I do so with knowledge."

"All I can tell you is that we will go just as far as is necessary to reform the system and make it work effectively again. I cannot bring myself to agree that there is anything radically wrong with the system which adjustment and reform will not remedy."

"Clearly, it would be unwise to circumscribe our activities by any attempted forecast of all that should be done. We can but move forward safely."

"I think there is, from all worth-while points of view, an inequality in the distribution of income."

"I believe there should be a uniform minimum wage and a uniform maximum wage. There must be an end to child labor. There must be an end to sweatshop conditions."

"However few or many unemployed we normally may have, no man must be left to the uncertainties of private charity or to the humiliations of government charity."

"We are going to do away, as quickly as possible, with emergency relief measures and put in a permanent system of sound and scientific insurance against unemployment."

"The present Old Age Pension act is unsatisfactory and obsolete and must give way to something which will serve us better."

Premier R. B. Bennett said, "the crash of 1929 was the collapse of the system."

Compensations

All people have experienced the effects of the depression in greater or less degree. All people suffer the same general, some small, but loss of one kind or another has been manifested by all. What about gains, because there have been gains, too, although it may be difficult for many people to appreciate the truth of that statement.

Emerson in his "Essay Compensation" held the comforting view that action and reaction always equal, that for every evil there is a good; even though the balance of good and evil still remains in the balance. But the facts of this life harshly support Emerson's idea. That for many, perhaps most, losses are compensating, or partially compensating gains is no doubt true; that hardships have their compensation is to be denied in the majority of cases; that for every action there is bound to be a reaction is also true, but it does not follow that every good action will result in an evil one, every bad action will ultimately result in good. Indeed, the results are all too frequently true.

But the past five depression years, with all their accumulated losses, and sufferings, and sorrow, with all their hard experiences and bitter lessons, have also brought good into the world; there are gains to be recorded on the credit side of the ledger.

A gain which has been effected during the war years was the ability of men and women of the twentieth century to stand hardships and face suffering and death without shrinking, even with a smile. Before the war it had almost come to be a fact that mankind had grown soft with the higher standard of life enjoyed, and with much leisure doing much of the hard work for us.

The depression years have given further evidence of this same fact. Men and women in countless millions have demonstrated the stamina of the race; they have revealed traits of endurance, of bravery, of heroism, unparalleled in war, and all called forth without the excitement of war but in the prose and poetry of the common people. The world has shown it can "take it"; that it has the grit and the spirit to hang on and carry on, that it can stand hard and stand back without being broken.

Twelve well known citizens of the United States have given their views of depression's effects in a symposium in a magazine recently issued. Changes have come, and come to stay, they admit, but the lasting effect of these changes is not yet known. The depression has been shown to be a great factor in the development of those old-fashioned principles and power values which makes man in danger of forgetting and losing in the years of abounding prosperity.

Henry Ford, for example, thinks the last five years have brought us all nearer to a society based on justice, opportunity and security. "We spent the first two years wondering when 1929 was coming back," he says. "We spent the next three years wondering when 1933 would come back." "What about the corner?" We have spent the past year believing in the new Clinton. But there are signs at least that people are beginning to take the hint, and are ready to enter a positive state of mind regarding this experience."

Rev. Harry Emerson Fosdick says: "Thousands of young men and women and all dressed up with an education and how nowhere to go. They are getting married, they are having babies, they are getting married, and are to-day facing the days of necessity of giving it all up and have."

Evangeline Booth, Salvation Army leader, says: "The depression has taught us that a city is not to be judged by its big buildings and its spectacular squares and monuments. The homes in the back streets are what constitute the city as a place to live. The impoverishment of the nation during these times has made us realize that we must live in the city. The demands of many people who had been brought up to believe they could live a life of ease, leisure and pleasure, have learned that they, like the great majority, must work; men and women who had looked forward to certain careers have been forced into entirely different channels, and many of them have found the new channels more congenial and better fitted to their talents and ambitions; initiative instead of being destroyed has been stimulated.

People have learned that, as Evangeline Booth says of a city, so with their individual lives. It is not the money or other possessions they may have, or may have had, that really constitutes life; rather it is something less material but much finer that makes for true happiness, contentment and peace.

In the world we are now about to re-create anew, there will be fewer indignantly rich men and fewer absolutely impoverished people; rather there will be a more equal distribution. There will be more rather than less individual liberty because, regardless of present day tendencies, man cherishes and will demand liberty as the most priceless of all his possessions. State and other autocracies may flourish for a time, but they cannot last, because they constitute a denial of all that is best in life. This, too, is one of the grand lessons being learned from the depression.

Speed of The Wind

New Speed Car Being Constructed In England

A new British car is under construction for an attempt to capture the 24-hour speed record in the United States, it was disclosed. It is being built in George E. Pye's factory, where car has a "speed of the wind." He believes he can break the record of an average speed of slightly over 127 miles per hour, and he will attempt it on the dry bed of a lake near Salt Lake City, Utah, next spring.

"Once a friend of mine and I agreed that it would be helpful for each us to tell the other all our faults."

"How did it work?"

"We haven't spoken for five years."

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason. Dr. Werner's Powder is the world's largest seller and prescribed by leading dentists; it holds teeth firmly in place and gives you a "natural" feel. "I've had false teeth for a long time now and I never forgot you ever had false teeth. Leaves no colored stains on your tongue and it has a fresh pleasant-the heat powder you can buy at cost is small—any druggist can give you a sample."

Bank Of Montreal

Sound Position Is Stressed At Annual Meeting

An interesting report of what the chartered banks of Canada are doing for the depositors was given by Sir Charles Gordon in addressing the shareholders of the Bank of Montreal. In the bank of Canada, he said, the shareholders are the depositors, the Bank of Montreal having one million. Depositors received during the last year some \$37,000,000 in interest and the interest paid to the shareholders amounted to \$12,000,000.

Touching on the services to the general public which the banks are performing, Sir Charles referred to the branches distributed over a vast territory of cities and villages in remote districts facilitating the handling of business.

Mr. W. A. Bog, Joint General Manager, in presenting the balance sheet of the bank, noted that the strong position of the bank had been fully maintained.

About 15 per cent. of the world's chemicals are manufactured in countries which in 1913 had no important chemical manufactures.

Palestine is erecting a radio broadcasting station.

A Treasured Keepsake

Lobret Blue Sugar Bowl Used By Louis Riel

Among the treasured keepsakes in possession of J. Z. Larocque, Lobret, Quebec, is a glass sugar bowl, that in all probability did duty for Louis Riel and Gabriel Dumont prior to the defeat of the rebels in 1885. This glass sugar bowl was an importation from England by the Hudson's Bay Company and was sold in Canadian stores and was taken in a raid by the Metis and Indians prior to the rebellion at Duck Lake.

The halfbreed and Indian rebels during their period of rebellion were fond of eating together, buck privates along with the commanders, in the dugouts on the sides of the hills and ravines.

The sugar bowl was used by Mr. Larocque, who was a member of Mr. Riel's party, and was used by him in the camp of Dumont and Riel, and after the defeat at Batoche, Dumont with some of his followers travelled by night to Fort Garry, where he took command of a United States Cavalry unit.

They travelled along the Prince Albert, Duck Lake and Touchwood trail that took them to the Qu'Appelle valley.

Last night Dumont and his followers arrived at the Larocque home and offered Mrs. Larocque the sugar bowl among other things for supplies such as butter. The exchange was made and the defeated rebels were in their way to reach the United States in safety. This table piece has been kept in the Larocque family ever since. It was cracked once, but has been repaired.

Equal Arms For Germany

Necessary Preliminary To World Peace Opinion Of Arthur Henderson

Recognition of Germany's right to national equality and independence is the demand of the British delegation at the disarmament conference, in receiving the 1934 Nobel peace prize.

Dr. Kelly, son of Dr. Howard Kelly, only surviving member of the "Big Four" who founded the Johns Hopkins University at Baltimore, Maryland, has been notified by Dr. A. R. Dafosse, the "babies" physician, that he need no longer worry about his son.

Dr. Kelly has been treated since last August for the growth and Dr. Edmund Kelly planned to return next summer, but, said, "this development may speed up things a little."

Dr. Kelly said that, because of the two forms of birthmarks, the growth on Marie's thigh is "raised like a raspberry and tends to spread." It is not malignant, he said, and will not interfere either with her health or with her beauty.

Dr. Kelly said that, because of the condition, Marie "subject to hemorrhage or to infection, as these growths must be destroyed."

Applied To Royalty

Date Of Gloucester Had To Obey Rule About Smoking

The most distinguished guest to have been the Duke of Gloucester, learned about an Australian regulation forbidding smoking in public buildings. A fireman on duty at a citizens' hall in the city show grounds asked the Duke to drown the cigarette which he was puffing. Townswoman's mayor hastened to the rescue and ordered the fireman to leave the building. But the fire chief stepped in and said his man was only doing his duty. The Duke meanwhile had stopped smoking.

Just One Mind

What has mathematics to do with old man's mind? A man is as old as his state of mind. Birthdays ought to be against the law, the other side of reckoning should be the growth in the condition of the memory. For youthfulness is measured by the subject's ability to forget how old he is.

Stop Growth On One Side Of Plant's Stem

The discovery of two new plants that can make plants grow in one direction, the light and the sun, was made by the Smithsonian Institute. These light rays, one blue and the other blue-green, have the mysterious power of retarding the growth of the plant, causing it to turn away from a plant's stem, the rays and some other causes the plant to bend.

Two New Sun Rays

Stop Growth On One Side Of Plant's Stem

The discovery of two new plants that can make plants grow in one direction, the light and the sun, was made by the Smithsonian Institute. These light rays, one blue and the other blue-green, have the mysterious power of retarding the growth of the plant, causing it to turn away from a plant's stem, the rays and some other causes the plant to bend.

The tridescence so attractive in ancient glass is produced, says the Field Museum, by chemical action.

MRS. HENPECK: "Explain yourself, James. It's twenty past one." MR. HENPECK (defiantly): "I don't care, Emily. I don't care if it's twenty-five past!" — The Humorist, London

Going In For Color

U.S. Motor License Plates Will Rival The Rainbow

The United States license plates for 1935 will present a new riot of colors.

Thirty-three states and the District of Columbia will change their 1934 color motifs, a check-up revealed, and the 1935 parade will present a kaleidoscopic variety that will put the rainbow to shame.

Black and various shades of green and blue will predominate, with a liberal sprinkling of white, cream, copper, orange, yellow, marmoset, o'd gold, pearl gray, purple and aluminum.

Black and yellow, found by the bureau of standards to offer good visibility, will lead the parade, having been adopted by Colorado, Kentucky, South Dakota and Virginia.

Second in popularity will be white on green, white on blue and black on white, each to be used by four states.

Moving away from these more solid colors, many states have adopted more artistic color combinations. Among these are blue on cream in Arkansas, colonial blue on old gold in Delaware, gold on marmoset in Minnesota, and yellow on midnight blue in Maine.

Appropriately enough, California will have orange on black; and Florida, black on grapefruit yellow.

New Discovery

Radium, The Gas Of Radium, May Be Used For Treatment Of Tumor

Used For Treatment Of Tumor

Radon, the "gas" of radium, will be used for the second time by Dr. Edmund Kelly if he is summoned back to Callander, Ont., to treat the tumor on the right thigh of Marie, the smallest of the Marie quintuplets.

Dr. Kelly, son of Dr. Howard Kelly, only surviving member of the "Big Four" who founded the Johns Hopkins University at Baltimore, Maryland, has been notified by Dr. A. R. Dafosse, the "babies" physician, that he need no longer worry about his son.

Dr. Kelly has been treated since last August for the growth and Dr. Edmund Kelly planned to return next summer, but, said, "this development may speed up things a little."

Dr. Kelly said that, because of the two forms of birthmarks, the growth on Marie's thigh is "raised like a raspberry and tends to spread."

It is not malignant, he said, and will not interfere either with her health or with her beauty.

Dr. Kelly said that, because of the condition, Marie "subject to hemorrhage or to infection, as these growths must be destroyed."

We have every reason to believe he will be quite a bit faster," he continued. "After all we'll need to clip only one second off the present time of 32½ seconds in the mile in order to beat the world's record."

"It's a tremendous gamble," he added. "There's no possibility of testing the car's actual speed until it is set down at Daytona, but my engineers and I are more than hopeful. Blinding speed is not the only thing that counts, otherwise we'll probably be a new car."

"We've devoted ourselves to streamlining, seeking better adhesion. Now it's a question of knocking a few seconds off the mile record. I have realized that one hump which would cause the car to leave the sand for a fraction of a second might mean the difference between success and failure."

Sir Malcolm expects to make his record run somethings between 20 and 24, depending on beach and tide conditions.

The Bone Building Value of Cod Liver Oil

PLUS ADDITIONAL BONE BUILDING MINERALS

Strong Bones and Sound Teeth are built of mineral salts in our food. Cod Liver Oil helps our bodies absorb these minerals.

Blue Bird Is Rebuilt

Sir Malcolm Campbell To Make Another Attempt At Speed Record

Eighteen months of elaborate research and hard work had been done by the Englishman of Dundee, Scotland, to make the Bluebird, for his next attempt in February on his own world auto speed record.

Work on the car has been proceeding steadily since the day he returned from his last trip to Daytona Beach, Fla., in 1933. Sir Malcolm said: "Several months before we went in wind tunnel tests before the car was built."

"In war years there should take control of the front house and their elders should take the driving posts. Gray beards would constitute the storm troopers."

Wal-motto in an Edinburgh office: Never waste your money on drink but always keep a corkscrew in your desk.

Radio telephone service has been established between all parts of Palestine and the outside world.

Fast Schedule For Giant Liner

Queen Mary's White Star Line, Will Break Records For Speed

Ninety-six hours from Southampton to New York will be the schedule of the Queen Mary, according to the Shipping Correspondent of the Queen Mary time table. The Queen Mary's time table will break all records as the giant vessel will speed across the ocean at a rate faster than any ship afloat.

Lunch in Cherbourg at 10:30 a.m. and arrival in New York at 11:30 a.m. afternoon—3½ miles in 96 hours—is the schedule which the Cunard Line has worked out for the new liner. To maintain this time table, the Queen Mary will travel at a speed of 32½ knots, which is four miles an hour faster than the average for the Atlantic crossing ever made.

Actually the reserve of power from the giant liner will be great enough to drive the ship at 34 to 35 knots. Thanks to her enormous size, she will be able to turn around in a turn-round of only twelve hours, which means that she will be able to disembark her passengers, re-store, re-fuel, embark new passengers, sail again within 24 hours.

Her multiple fuel oil tanks, with a capacity of 6,000 tons, can be re-filled in 12 hours.

For the first time in the history of North-Atlantic travel, the exact hour of arrival will be announced at New York at 11:30 a.m. and at Cherbourg at 10:30 a.m.

Special staffs at each of the ports concerned will undergo a course of training to qualify them for the necessary co-operation which will make this amazing programme feasible.

All of Kirby's 65,000 inhabitants observed one minute of silent prayer to express their apologies for an incident caused Emperor Hirohito at Kirby, Japan, when he was directed over an incorrect route.

KEEN'S PAINTING CONTEST PRIZE WINNERS

SD many beautifully painted books were sent in, it was hard to choose to select all get all the nice prizes. First prize was finally awarded to:

THELMA HILLIER (14) Bradford

5 & 7 YEARS OLD
1.—LOID KIDDLELL (7), St. Catharines, Ont.
2.—ALEX. C. NEWLANDS (6), Barrie,
3.—HARRY HILL GRAHAM (8), Galt,

4.—ANDY 10 YEARS OLD
1.—GEORGE IRICA (12), Crosshill,
2.—EDGELINE GIBERT (9), Doncaster, S. Dak.
3.—PAUL PATERSON (10), Pitt Falls, Man.

THE EMPRESS EXPRESS

WORLD HAPPENINGS BRIEFLY TOLD

The United States war department awarded a contract for 110 attack planes to the Northrop Corporation, Ingleside, Cal., for \$1,866,400.

General Secretary president of the League of Nations disarmament conference, has been awarded the Nobel peace prize.

The government decree banning circulation in Austria of German newspapers was extended for another two months after the date of expiration December 12.

The radio station of the General Electric Company stated that a radio grant from Little America said the Byrd Antarctic expedition intends to leave for New Zealand and New York last week.

The postal department of the Palestine government announced that telegrams written in Hebrew will be accepted for transmission and that it is no longer necessary to translate into Latin letters.

The second world's longest air mail, the 12,240 miles from Brisbane to London, was inaugurated Dec. 10, when the Duke of Gloucester, with a wave of his hand, dispatched the first two northbound planes.

Approximately 400 men will be sent as members of an International Police force to the Suez to maintain order during the forthcoming plebiscite. Britain will furnish the largest number and will have charge of the command.

The Earl of Willingdon, viceroy of India, will find time to participate in the 25th anniversary of the King's accession to the throne next year, the proceeds of which will be devoted to the Indian Red Cross Society and kindred organizations.

Salt Mines Of Poland

Men Who Told In Sheds Were Deeply Religious

Visitors to Poland return greatly impressed with the salt mines. For more than ten centuries miners toiled in the salt shafts near Cracow, Poland, until before the war they spent their time in carving marvellous figures in salt. A complete cathedral, containing giant chandeliers, beautiful statues of the saints, birds and other salt figures, and objects in the example of the workers' skill. On feast days of modern times, Mass is held in the underground cathedral. Among the statues is that of the Virgin. In one part of the mine a giant statue and a bell were hung, monuments to the devotion of the miners.

Buffalo Hides For Eskimos

Parts From Walnwright Are Going To Arctic Dwellers

Eskimos along the bleak coast of Hudson's Bay will shortly blossom out in buffalo coats similar to those that the Indians wore. The skins, from the same Mammal of the Plains will be fed to workers in Federal relief camps.

The department of the interior wants some 600 "green" buffaloes from the Arctic, Walnwright, to Fort Churchill for distribution. This innovation for the Arctic dwellers forced reports of suffering among Canada's wards to a scurry of caravans.

The buffle hides will be cured and dressed by the Eskimos for clothing and bedding.

Justice For Indian

B.C. Government Awards \$350 For Justice Done Wrongly Laid

An Indian, John W. N. E., unjustly fined in 1931 for possession of a sex-arter pet, was awarded \$350 compensation by the British Columbia government for the confiscation skin injury to his reputation and ruined his life.

The Indian, Daphne, whose fine was assessed \$35, fine and costs, and the pet was confiscated when he was arrested by a game warden three years ago. It developed, however, the prosecution was wrongly laid as the game act does not apply to Indians hunting on their reserve.

Mountain Slugs From View

Disappearance of an entire mountain caused by an earthquake which has caused a great deal of concern in Honduras, was reported in daily communications. The report related that Mount Cerroazo sank from sight with a tremendous detonation. Observers in the town of Paraiso said the mountain crumpled without sign of any volcanic eruption.

Chinese Quarrel With Gods

Behead One Which Has Failed To Supply Rain

The Chinese people are quarreling with their gods, and one of the chief of them—the Dragon god, whose name is Lung—was recently beheaded. At Jiahu in Honan province, the villagers carried from the temple the image of the Dragon god and forced the magistrate against his will to let the heavens pour rain in the hope that the gods would remain there, for seven days and if even then no rain fell he would allow the beheading of the image. No rain fell so the successor stepped forward and the magistrate allowed three more of grace. But to no avail. He then ordered out a firing squad and they shot off the head of the image, pulled deity. Even this brought no rain, so the magistrate had to stop all work and let the people go to their gods. And they are now being threatened by a famine.

FASHION FANCIES

THE HIGH NECKS HAVE IT! A PRECIOUS MODEL AND SO EASY TO FASHION

You'll like this individual model as soon as you see it with its softly falling, flowing lines. The high neck is another interesting new feature. The bodice is draped and wrapped like the slender skirt.

Ruby-red crepe silk made this attractive garment. It has a subtle bengaline bib collar and flared cuffs.

Bottle green wool crepe with the bib collar and cuffs and rust novelties crepe is very effective, with a brown wooden button at the center of the waist.

Velvet with silver lame trim is striking for "dressy" wear.

Size 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34 and 36 inches.

16, Size 16 requires 3 yards of fabric and 1½ yards of lace.

Patrons 20 each. Address mail to Mrs. E. W. Winkler, 175 Madison Avenue, New York.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is offered for 25 cents. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

First "Czar" Of Russia

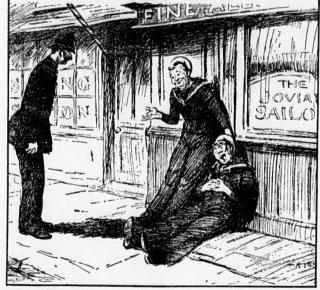

Ivan The Terrible Was Greatly Feared By People

The British Museum has a rare portrait of Ivan the Terrible. He lived in the court of Elizabeth and was the son of a ruler who had taken the title of czar, a corruption of Caesar. His deeds were so infamous that for centuries after his death Russian crossed themselves at mention of him.

One of the most popular legends is that Ivan the Terrible was driven by letter to Queen Elizabeth for her to marry him. The woman he wanted was an Englishwoman, but at the last moment the woman was afraid to go into exile in Russia. Ivan then married a Russian princess, whom he exiled to Siberia on his orders. But after her death he gave full rein to his unbridled passion. He passed his last days surrounded by magnificence, who could not, however, exercise the ghost of his son whom Ivan had slain.

Evening classes in London this winter have 250,000 pupils and 7,000 instructors.

THE EMPRESS EXPRESS

CONSTABLE: "Why don't you get him back to his ship?"

SAILOR: "Trouble is, officer, I can't remember its name. All I know is it's the same ship as mine."

Colored Films

Latest Developments In Color Photography Shown In London

Britain is likely to go in for colored films at an extensive scale, it was decided in London following the showing of latest developments in color photography.

The newest process is known as duoficolor and the first film of three stages showed ladies dressed in the most delicate hues and revealed subtle shading such as has not hitherto been attained on the British screen.

Duficolor was said to be the first step from the present stage of color toward the permanent production of all color talking pictures. A factory is to be erected shortly at Wembley, Middlesex, it was reported, for the manufacture of 2,500,000 feet of color film per week.

Anti-Aircraft Weapon

Swedish factories have perfected a new high-powered anti-aircraft gun which has been demonstrated successfully to the general staff of the army. The gun is of 40-millimeter calibre, 11 inches long, and can fire 130 shots per minute, has a range of 25,000 feet and can be placed in position within three seconds.

Duficolor was said to be the first step from the present stage of color toward the permanent production of all color talking pictures. A factory is to be erected shortly at Wembley, Middlesex, it was reported, for the manufacture of 2,500,000 feet of color film per week.

BAVARIAN CREAM

(Serves 6-8)

1 tablespoon granulated gelatine

1/2 cup cold water

1 cup orange juice and pulp

3 tablespoons lemon juice

1/2 cup sugar

1 cup cream

Souk gelatin in cold water for 5 minutes and dissolve by stirring continuously mixture of water and sugar. Add to orange juice, pulp, add lemon juice, sugar and salt. When it begins to jell fold in whipped cream; turn into cold mold to become firm.

Poker parties for charity are popular in London this winter.

British Officer Is Beaten By Menacing Mob In Saar Area

Saarbruecken, Saar Territory.—Tension accompanying the approaching Saar plebiscite was increased here Sunday by the arrival of Saar residents and the beating by an angry mob of a British member of the League of Nations' international police force.

A bullet from the pistol of Captain James Justice, an Englishman, struck a man in the stomach, causing him to fall to the official witness of the incident, after Justice's automobile, carrying two other men, mounted the sidewalk of a narrow street and struck a woman.

Deputy Justice, a member of the German Front, the Nazi organization in the Saar, called upon the Dutch member of the league governing commission to take measures "to prevent the recurrence of such incidents."

When an angry crowd gathered about him, Justice drew a pistol. The crowd closed in, menacing him, and hands reached out to seize the weapon. During the scuffle the gun went off twice, one bullet striking an elderly woman, Neustadt. He was not seriously injured.

The crowd, numbering about 30 persons, immediately closed in upon Justice and beat him badly. He was taken to hospital.

No one was able to go home after his wound had been dressed at a pharmacy.

The official version of the incident said Justice and two compatriots, driving a private car, turned into a narrow street and right wheel man, the sidewalk, scattering groups and injuring a woman.

Justice, a captain in the police force, fled and apologized. The woman was treated at a pharmacy. A crowd of 30 persons gathered around the impression Justice and his compatriots sought to leave the scene and tried to hold them by force. Justice therupon, believing he was in danger, drew his pistol and fired a warning shot.

The crowd rushed forward, seizing Justice and pulling him from his grasp, and another bullet from the revolver slightly wounded Neustadt. Justice then fell, badly beaten and was taken to a hospital where he died.

Closie investigation of the incident is now progressing and Justice is officially suspended from duty.

Justice had been in Saarbruecken for several days, having recruited with hundreds of other expatriates for international police work. As far as is known he has never been in the British army. The incident was described by officials as of minor importance.

Regarding the incident may create a bad atmosphere for the arrival of international troops and for the local international police force, the government commission announced its intention to make a vigorous investigation in "the interest of the League of Nations," which will be opened immediately by the police will be communicated to the judicial authorities."

British Troops In France

Calais, France.—The first British troops to set foot on French soil since the beginning of World War II have landed here. The contingent, part of Great Britain's contribution to the international force for patrol of the Saar territory, was billeted in the ancient citadel awaiting arrival of the rest of the British regiments.

Troops Of Five Nations Make Preparations To Patrol Saar Territory

Saarbruecken.—Saarbruecken, metropolis of the Saar basin territory, is now the focal point of preparations for the Saar plebiscite on March 13.

While troops of five nations ready to join the international force to patrol the territory, the Saar Plebiscite Commission acted to insure fair and secret balloting.

The Saar plebiscite regulations requiring that voters register and seal their ballots unfolded in closed booths and that the ballots cast in each district be brought here by neutral officials to be tabulated by neutral tellers.

Meanwhile, detachments of the British contingent for the international force reached France and

Railway Legislation

So Far No Change In Policy Has Been Adopted

Ottawa.—So far no steps have been taken to prepare any major railway legislation for the approaching session of parliament, it was learned here. This is taken to indicate that the government is at present plane to the country without any important change in its railway policy now in operation.

Debated on the best method of dealing with the country's railway problems with both houses break out in the House of Commons during the session even though no definite legislation to start it.

The proposal of E. W. Beatty, president of the Canadian Pacific, and of G. H. D. Blair, vice-chairman of the Canadian National, for a unified system of ownership by a holding company, will rally supporters. The government, those in close touch will think, stand for the present scheme of co-operation.

Considerable emphasis is being laid on the improved revenue showings of the Canadian Pacific and the Canadian National during this year. The Canadian Pacific's gross earnings in 1935 were up about \$100,000,000 and the C.P.R. around \$110,000,000.

Trans-Canada Air Mail

Predicted Service Will Be In Operation By 1939

Edmonton.—Declaring that the route will be completed by the fall of 1939, K. E. Whyte, Regina statistician for Western Airways, stated yesterday that he expected the operation of a Trans-Canada air mail service by 1938.

"While we have no definite information, we expect it by that time."

He declared that emergency landing fields being built in the Crown's Nest Pass in the Rocky Mountains, while 10 fields have been built out in the forests of Ontario.

Mr. Whyte was accompanied here by Squadron Leader J. H. Tudehope, chief of the civil aviation department, Ottawa.

Quality Should Be Maintained

Advice Given To Our Producers By Hon. F. S. Grisdale

Edmonton.—Hog producers should strive to maintain quality, especially since the margin of profit in production is small, as in the past two years, when hog prices fell to record low levels.

Mr. Grisdale was accompanied here by Squadron Leader J. H. Tudehope, chief of the civil aviation department, Ottawa.

Wheat Marketing Difficulties

Chicago.—Removal of wheat from flour mills to the grain elevator and back again to the flour mill is a world solution of present marketing difficulties that can be found in the pattern of production and export quotas, W. Sanford Evans, M.L.A., prominent marketing statistician, told members of the grain market analysts club here.

No Gas Probe

Edmonton.—A probe investigation of gas prices cannot be im-

derstood by the federal price spreads committee in view of the shortness of time before reporting to the Dominion parliament, according to a letter Premier Reid received from W. W. Kennedy, committee chairman.

Seamen Lose Lives

Drama Of Bravery And Death On Stormy Atlantic

New York.—The gripping story of how eight seamen lost their lives in a drama of bravery and death on the gale-tossed Atlantic was told to save the wireless waves by a valiant Belgian skipper.

In true but striking phrases, Captain Louis Goethier of the S.S. Jean Jadot described the tragic climax to his attempt to rescue crew members of the British freighter Usworth in a single lifeboat that capsized in the crashing seas.

"One big wave capsized the boat and all occupants," he wirelesse the Associated Press. "We lost two."

His brief description of the Usworth in a single lifeboat that capsized in the crashing seas.

His brief description of the U

Direct Research Toward Colds

Funds Provided For British Scientists

By Sir Henry Royce

At last science is going to war with the germ of the common cold. Ammunition is provided by the will of the late Sir Henry Royce, automotive engineer of Rolls-Royce fame. In his will, he left £100,000, a sum, two unknown British research workers are to be provided with finances with which to support themselves while finding a cure for colds, a problem which up to now has defied medical science.

In his will Sir Henry set aside one-tenth of his fortune for "research for the improvement of health, or preventing disease, in the human race."

Already, certain committees have been set up to Royce Research Fellowships, one at Manchester University and the other at London University, with the object of the fellowship researches to be "the cause and cure of the common cold and the cause and cure of influenza."

The decision to direct the research toward the colds followed the revelation a few years ago by the British Medical Research Council that common colds cost the world billions of dollars annually, not only in actual expenditure but in lost working time, costs of medical council, for some years coming, to the nation toward a preventive cure, recent announcement it would abandon its existing researches until a new line of investigation presented itself. Its researcher had failed to develop effective treatment.

"We have decided to turn our attention to a cure," C. H. R. Tilley, one of the trustees, declared. "To expect such would be foolish. But we do feel that the research fellowships can be exceptionally promising for administration and progressive work which may produce good results. In any case, this is an initial effort and it is one, we feel that Sir Henry would have approved."

We have no record of the provision of Sir Henry's testament but the funds have been fulfilled, research funds may be expanded. Mr. Tilley said, and other common ailments of man look likely to be cured in a day,"

Will Have New Headquarters

Timothy Eaton Residence In Toronto Given To L.O.D.E.

With its 20 rooms and unique interior decoration and equipment the residence of the late Timothy Eaton, and Mrs. Eaton, in Toronto, Ontario, has been given by their daughter, Mrs. J. S. Burnside, to the Imperial Order of the Daughters of the Empire, to be used as their headquarters.

There are many interesting features in the house, among them the north end of the front hall, which is mirrored from floor to ceiling. The whole, framed in gold pillars, and decorated with floral carvings in red and blue, stands as does the large front drawing room, with its crystal chandeliers and brocaded satin walls, of the days when pony-packets were the rule.

Another interesting feature is the conservatory, tiled in gray marble, the east wall, composed of rough stone in which ferns and rock plants are embedded, forming a living screen of greenery.

Famous For Great Wealth

Croesus Derived His Money From Industry Of People

Croesus, the king of Lydia from 560 B.C., and who was famous in antiquity for his great wealth, was king of Lydia, in Asia Minor. According to tradition, his wealth was principally obtained from the gold sands of the River Pactolus, which flowed through his dominions. The source of his riches was probably the industry of his people, who were not only great producers, but great traders. Their chief export of the excess of his wealth in those days was his own lands properties, from which an ingenious archaeologist has estimated them to have been worth between \$3,000,000 and \$9,000,000.

Ingenuity Of Beaver

The ingenuity of the mischievous felling wire at Springfield, N.S., is cleared up and with the solving of the theft proof was supplied that beavers know how to build a dam in the first place. The wire which was left beside a fence and recently it was found to be missing. An investigation disclosed the wire—holding the logs and bushes of a beaver's dam in place.

Diner—"You can't expect me to eat this stuff! Call the manager!" Walter—"It's no use; we won't eat it, either!"

W.N.U.

Reports from Copenhagen, Denmark, state that Prince Erik, nephew of King Christian X, and his princess, have petitioned the King for permission to seek a divorce. The marriage stirred Canadian society ten years ago, when several members of the Danish royal family travelled to Ottawa for the cure. Above is a picture of the royal couple taken shortly after their marriage, while inset is a recent photograph of King Christian X.

Still Keeping Watch

Collie Waits Eleven Years For Master Who Is Dead

JULY 11 marks the eleventh year of a decade "Shop," a loyal Scotch collier, ward of the Franciscan Sisters of St. Anthony's Hospital at Rock Island, Ill., waits patiently the return of his late master.

For days past he has maintained a lonely vigil on the first floor of the hospital, never leaving for more than a moment or two at a time, an advantageous spot where he can keep constant watch on the elevator cage.

Appearing by his faith that the object of his devotion, Francis McMahon, who in his life read McErlane, Ill., will some day return has never faltered.

On August 24, 1924, that McMahon had gone by to his collie. The dog saw his master enter the elevator as a stretcher. Never in the intervening years has the melancholy sight been forgotten.

McMahon had been called off, leaving expectantly for a familiar face.

Suffering a fractur'd skull as a result of a fall down stairs, McMahon had his head bound in a cloth and laid him wait in the lobby. The word from the master was law to him and he settled down for his long vigil. The next day McMahon died and his body was removed by another exit.

Kidnapping Racket

Most Remove The Element Of Profit

To Put End To The Game

It must be galling to the American police to realize that payment of the ransom of a woman kidnapped by a hoodlum after the police had been called off. Every successful crime of this kind makes repetition more likely and the kidnappers more brazen. The system as that recently suggested seems to indicate that the state would seize control of all monies of the family seems to be the only feasible way of halting the plague which is spreading all over America.

Only one method of prevention of possible profit is removed will kidnapping be stopped—unless the kidnappers are caught and punished—Niagara Falls Review.

Refuses To Pay Dated

Burton Pokes, a small village in England, has a dictator because it refuses to pay a debt. Owing to litigation last year it is \$750 in debt and refuses to touch its "nest egg" of \$1,340. There is no council because there is no town. Only one person is anxious to serve. Therefore the County Council has appointed a dictator and has imposed a special tax rate to cover the debt.

All Space Booked

The popularity of the British Industries Fair as a medium for exhibiting Canadian products before buyers of the United Kingdom, the empire and the world at large, is indicated by the fact that this year all space in the Canadian section at Olympia, London, has already been booked.

Miss Uppity thinks no man good enough for her; she may be right. "And she may be left."

DANISH CANADIAN ROYAL ROMANCE WANES

The Real Delinquent

Parental Neglect Very Often Responsible For Juvenile Crime

WE in Canada are accustomed to seeing the terrible results of neglect for arthritis and other diseases, given by our own Dr. Locke of Williamsburg, as being miraculous enough. And there are even sceptics who are not disposed to take the words of the experts seriously, although his bellows are logical and the results he obtains apparently speak for themselves.

But Dr. Van Paassen writing from Paris to a French newspaper, claims that it is more remarkable, if not more miraculous still, the healer is Dr. Armand Gillet who like Dr. Locke, is said to be a veritable genius. And his methods are equally simple, though his pair of small "sayets" or thin metal staves, about six inches long.

By this treatment, claimed to represent the fruits of years of research, a standard effect is obtained in curing rheumatism, sciatica, rheumatism and so forth. He is reported to have many marvelous successes to his credit and the people flock to him as do to Wiliamson's Wonders will never cease! Quebec Chronicle-Telegraph.

Leaves Germany For Good

Former Canadian Girls Say She Will Never Go Back

Four months of imprisonment ended for Isabel Lillian Steele, of Holywood, Cal., and Dorothy of Toronto, who was released from police headquarters in taken to Hamburg by a police matron, where she sailed for home.

She had promised German authorities she would remain in Europe about as long as she was in Germany—and she maintained it.

"They will bring me back to prison if I tell you anything," she replied as she walked up and down the rail platform, her hands clasped behind her head. "I feel well and I am not sorry to leave Germany under the circumstances. I will never, never return."

There is no combustion at the center of a flame.

Experiments have shown that an individual fly may carry over 25 million germs.

FANCIFUL FABLES

Considered An Asset

Short Accent gives Man Character Opinion Of London Manager

An accent is an aid to success in any career. It is more valuable than pure King's English. But it must be slight. That is the opinion of a leading London employment manager said:

"It is quite true that a strong cockney accent will hold back any young man or woman in their careers and prevent them from rising to responsible positions. This is especially true of positions in the civil and professional law.

"But this applies to all accents from every corner of Britain. I shudder to think what it would be like if everybody spoke unaccented English. It is too stereotyped. It is a dead language. A slight accent gives a man character."

"The only real way to deal with any child who talks with a strong accent is to place it in a different environment at once, so that it can learn a more cultured way of talking."

Revenue From Pumpkins

About \$10,000 Will Be Return For Pumpkins

Pumpkins, gourds and more gourds, enough to make pies for thousands of families were harvested this year in Colebrook district, B.C. There were 50 acres under cultivation and approximately 1,000 tons, or 2,500 bushels, of the bright orange vegetables.

Culinary experts at Surrey state that this 2,000,000 pounds of pumpkins would be sufficient for about 1,300,000 pumpkins of the plump, round variety.

Last spring Colebrook farmers entered into contracts with canning plants to grow pumpkins. The canners supplied the seed and guaranteed a price of \$10 a ton.

The yield approximated 22 tons per acre and greatly exceeded all expectations.

As a result the gross return to Colebrook farmers this year will be about \$10,000.

Should Be Interesting

Investigation By Science Of Clairvoyance Is Planned

The first scientific investigation of clairvoyance is shortly to begin in London.

S. G. Soal, lecturer in mathematics at the East London college, will be in charge.

Fifty persons claiming powers of clairvoyance are to be brought to the laboratory in South Kensington one at a time.

Thousands of cards are being prepared, on each of which is one of five diagrams.

The alleged clairvoyant will then shuffle a pack of about 100 of these cards and place them up upwards, one by one, and the subject will be asked to identify them.

As soon as he is placed before him he will be invited to describe the nature of the diagram on the other side. Each reply will be recorded on specially tabulated sheets.

Energy Of A House Fly

Enough Power Developed To Operate A Radio Set, Says Electrical Expert

If the energy spent by a house fly in working up and down could be measured over enough time it can run a radio set night and day for four years could be secured, a started audience at the Toronto Electric Club was told by A. Mansfield Dudley of the Westinghouse Electric and Manufacturing Company of Pittsburg.

Another of the "believe-it-or-not" statements by which Dudley amazed his audience was that the advances made by exposition of the natural sciences in microscopes and astronomical instruments have made it possible to construct a quartz crystal and being quite independent of the earth's irregularities cannot go wrong.

Spiders Travel On Thread

Spiders, more so than other insects, are particularly susceptible to the congenitality of their surroundings, a French naturalist has established. They often take a great dislike to a place and when they find themselves in a place which they do not like, they climb to the top of a tree and weave a long thread from which they suspend themselves. The wind comes, detaches the thread and carries the spider away, sometimes for a considerable distance.

It is possible for an aeroplane to fly lower than a submarine can dive. The Sea Gull, where aeroplanes are 650 feet below sea level, far beyond the record depth for underwater boats.

"Haven't I seen you before?" asked the judge.

"I've just applied the tailor. 'So many men owe me money I can't remember their faces.'

Realize Own Position

Canadians Are Losing Inferiority Complex States Toronto Man

As is inevitable where there is so great a difference in population, Canadians are not generally regarded by outsiders as suffering from an "inferiority complex"; but, according to Mr. Denton Masey, of Toronto, this is the case. The reason for this is, in normal times, because the United States "holds the spotlight" as the "wonder nation" of the world. This feeling, however, Mr. Masey declares, is due to the economic and financial structure. This resulted in the realization by Canadians of their own national position. As he put it, Canada has shown itself to the world as a nation which has achieved in the world to-day what it deserved to have.

"But this applies to all accents from every corner of Britain. I shudder to think what it would be like if everybody spoke unaccented English. It is too stereotyped. It is a dead language. A slight accent gives a man character."

"The only real way to deal with any child who talks with a strong accent is to place it in a different environment at once, so that it can learn a more cultured way of talking."

**16. A meeting of U.P.A. dele-
gates is being held in the Pro-
fessional Bible Institute on Mon-
day, January 14 in the evening.**

**Mr. Fox, superintendent of
the Medicine Hat division of
the O.P.R. and Mr. Jackson,
master mechanic, and Mr.
Thomas, were visitors in town
on Tuesday night.**

the comfort of others and the
benefit of the owner.

The common cause is a dirty
mouth. There is always
germs in the mouth which are
ready to seize upon the smallest
particles of food left between
the teeth, and the result is for-
mentation and putrefaction, a
little bit of which goes a long
way in fouling the breath. De-
spite all that is said, there is no
mouth wash which sterilizes
the mouth. The practical way
is to have the teeth healthy, be-
cause there is an odour to
decaying teeth as there is also
to the tartar which collects
around the teeth. When the
teeth have been made healthy,
they should be kept clean by
regular brushing after each
meal.

Others do not arise from the
stomach unless air is brought up
from the stomach. When belching occurs, there should
not be any disagreeable odour
if the stomach is healthy. Some
foods contain volatile oil; these
are absorbed after digestion
and, when carried by the blood
stream to the lungs, they are
smelt on the breath. This is
what happens when you eat
onions or drink alcohol.

There are parts in and around
the mouth and nose which may
become diseased and so taint
the breath. Tonsils with their
epithelial material, and head sinuses
become disagreeable on account
of infections. When elimination
is delayed, it usually means
putrefaction in the lower bowel,
with absorption of material,
which gives rise to an unpleas-
ant breath.

It appears that most cases of
halitosis break would be pre-
vented by keeping the mouth
and subject parts clean and
healthy, and by securing satis-
factory elimination.

**Stray Animals
(Impounded under Domestic
Animals Act)**

**One Steer, Red, white faced, slit on
ear, 2 years old - no visible brand.**

**One Sheep, white faced, 2 year old,
no visible brand.**

**The above animals are held at William
B. Campbell's ranch, Buffalo, S.E. 1/4
12-22-5, w4.**

At the beginning of 1933, ac-
cording to the report of the

Municipal Affairs Department,
printed recently, the seven
city municipalities of Alberta
had cut \$75,530.38, 35 towns had
reduced their debt by \$149,595.
00; 145 villages by \$10,816.35
and 5 municipal districts by
\$1,351.05. Only 3 districts out
of 165 have outstanding deban-
tures.

BEST SUGAR OUTPUT

Production of sugar beets in
Southern Alberta during the
past season has been estimated
to be over 178,000 tons, a considera-
ble increase over last year. The
output of sugar from the fact-
ory at Raymond is expected to
exceed 50 million pounds for
the first time since the factory
was opened.

**Full Speed is Ordered
In Printing Voters' List**

Ottawa, Jan 1.—Instructions
for full speed ahead on the

printing of the voters' lists have
been issued to the government
printing bureau, lending a mea-
sure of support to rumors of
an early general election. The
bureau was told to have the
lists ready by April.

Some 100 printers are being
engaged, along with the neces-
sary numbers of proofreaders.
New linotype machines have
been installed and everything is
being made ready for the gigantic
task of printing the names of
6,000,000 voters throughout
Canada, in addition to the rou-
tine work of the bureau.
